PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate with hands-on experience in software development, full-stack web development, and UI/UX design. Proficient in C++, Java, JavaScript, SQL, React.js, and Node.js, with hands-on application of OOP, SOLID principles, and Design Patterns, alongside SDLC, Agile workflows, DBMS, and Operating Systems. Built and deployed web applications, contributed to an IoT-based healthcare research project, and solved 161+ coding problems on LeetCode using C++. Interested in Software Engineering, C++ Development, Full-Stack Development, and Front-End Development.

TECHNICAL SKILLS

Programming: C++, Java, JavaScript, SQL, Python (Basic)

Web Development: React.js, Node.js, Express.js, MongoDB, HTML, CSS, REST APIs

Computer Science: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Design Patterns

Engineering Practices: SDLC, Agile, Testing, Debugging, Documentation

Tools: Git, Docker, Postman, VS Code, Figma, Canva

PROJECTS

Multi-Level Parking Management System

Java, Design Patterns, JDBC, SQLite, JUnit 5, Maven

2026

- Built a console-based parking management system in Java, applying Factory, Strategy, Observer, and State design patterns to model vehicle allocation, dynamic pricing, and slot-lifecycle management.
- Designed a persistence layer using the Repository pattern and Dependency Inversion, enabling a live migration from file-based storage to SQLite (JDBC) with zero changes to business logic.
- Implemented a reservation system with automatic grace-period expiry, using the State pattern to enforce valid slot transitions and prevent invalid state changes.
- Wrote unit tests with JUnit 5 covering pricing logic and edge cases; maintained a clean, layered package structure following SOLID principles throughout.

Intelligent Plantar Pressure Monitoring System for Early Prediction of Diabetic Foot Ulceration

ESP32, FSR Sensors, Temperature Sensor, IMU, IoT, Machine Learning

2026

- Developed a sensor-driven plantar pressure monitoring system aimed at early identification of abnormal pressure patterns associated with diabetic foot-ulcer risk.
- Integrated FSR-based pressure sensing, temperature monitoring, movement/IMU sensing, and ESP32-based data acquisition for real-time monitoring and implemented a monitoring workflow for visualizing sensor readings.
- Co-authored the conference paper An Intelligent Plantar Pressure Monitoring System for Early Prediction of Diabetic Foot Ulceration, published/presented at ICACCS 2026.

SnapMusic - Full Stack Music Application

React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

2024

- Developed a full-stack music application with secure JWT-based authentication and API integration.
- Implemented search, playlist management, and responsive user interfaces using modular frontend and backend components.
- Followed maintainable application structure and Agile-style iterative development practices.

Personal Portfolio Website

React.js, JavaScript, CSS, Vercel

2025-2026

- Designed and deployed a responsive personal portfolio website showcasing projects, skills, experience, and professional work.
- Implemented responsive layouts and modern UI patterns for desktop and mobile viewing.
- Deployed the application publicly using Vercel.

CERTIFICATIONS

- C++ Development - LinkedIn Learning
 - Software Development Life Cycle (SDLC) - LinkedIn Learning
 - TCS NQT (Cognitive) - TCS iON
 - Fundamentals of User Experience Design - Google
 - Introduction to IoT & Embedded Systems - University of California, Irvine
 - Programming Python for Everybody - University of Michigan
 - Docker Essentials - IBM (In Progress)
-

EXPERIENCE

- Intern Trainee - Variac Electricals May 2025 - Jun 2025** 2025
- Conducted usability testing and customer research to improve an existing web application.
 - Designed responsive UI prototypes and supported implementation discussions.
 - Improved navigation clarity and content structure using user feedback and research insights.
- UI/UX Design & Development Intern - ZettaStacks Pvt Ltd May 2024 - Jul 2024** 2024
- Worked across requirements gathering, UI design, and development workflows under SDLC and Agile practices.
 - Designed and prototyped the Admin'sHub HR dashboard using Figma.
 - Collaborated with developers during design-to-implementation phases and contributed to testing, documentation, and feedback cycles.
- Student Intern - Enthi Tech Mar 2022 - Apr 2022** 2023
- Built IoT prototypes using Arduino and sensor modules.
 - Debugged hardware-software interactions and documented procedures.
 - Gained hands-on exposure to system integration and testing practices.
-

ADDITIONAL PROJECTS

BooringGames - Web Gaming Platforms

HTML, CSS, JavaScript

- Built a browser-based gaming platform integrating multiple interactive games.
- Focused on responsive design, frontend performance, and cross-browser compatibility.

Admin'sHub - HR Dashboard

Figma, UI/UX, SDLC

- Designed an HR dashboard supporting task scheduling, interview tracking, and data visualization.
- Applied wireframing, prototyping, usability principles, and documentation aligned with SDLC practices.

Gradient Backgrounds - Web Platform

HTML, CSS, JavaScript

- Built a lightweight web tool for browsing predefined gradients with directional controls and real-time preview.
 - Added functionality for users to copy gradient color values for reuse.
-

PUBLICATIONS & ACHIEVEMENTS

- Conference Publication: Co-author of An Intelligent Plantar Pressure Monitoring System for Early Prediction of Diabetic Foot Ulceration - ICACCS 2026.
- Problem Solving: Solved 161+ problems on LeetCode using C++; no competitive programming contests claimed.
- TCS IPA: Qualified and appeared for the TCS IPA Assessment; results awaited.
- Leadership: Joint Secretary, KNOCKIA Department Student Association (Jul 2024 - Nov 2025).
- Technical Event: Coordinator, AVANTAA'24 National Level Technical Fest.

EDUCATION

B.E - Electronics and Communication Engineering

Sri Krishna College of Technology, Coimbatore | Graduated May 2026

LEADERSHIP & ADDITIONAL EXPERIENCE

- Freelance Creative Work: Completed 5 commissioned artworks, provided UI design assistance and poster design, and supported 4-5 advertising shoots with video editing for a catering-service client.
 - Department Leadership: Coordinated academic and technical activities through KNOCKIA and AVANTAA'24.
 - NCC: Certified Cadet; developed discipline, teamwork, communication, and organizational skills.
-
